Mud In Ring with clamps

Product Description - recessed long life LED fixture

This LED fixture offers high lumen output, recessed point light source, and safe low voltage operation.

Operating at 6 watts, with over 780 lumens, this LED fixture allows code compliant LED installations in single family or MDU with low voltage wiring. Because all the power in goes to the LED (there is no driver or electronics involved) and because the COB LED source is not diffused – the Lumen output is comparable to 10 watt 120 VAC fixtures.

Technical specifications TL-60

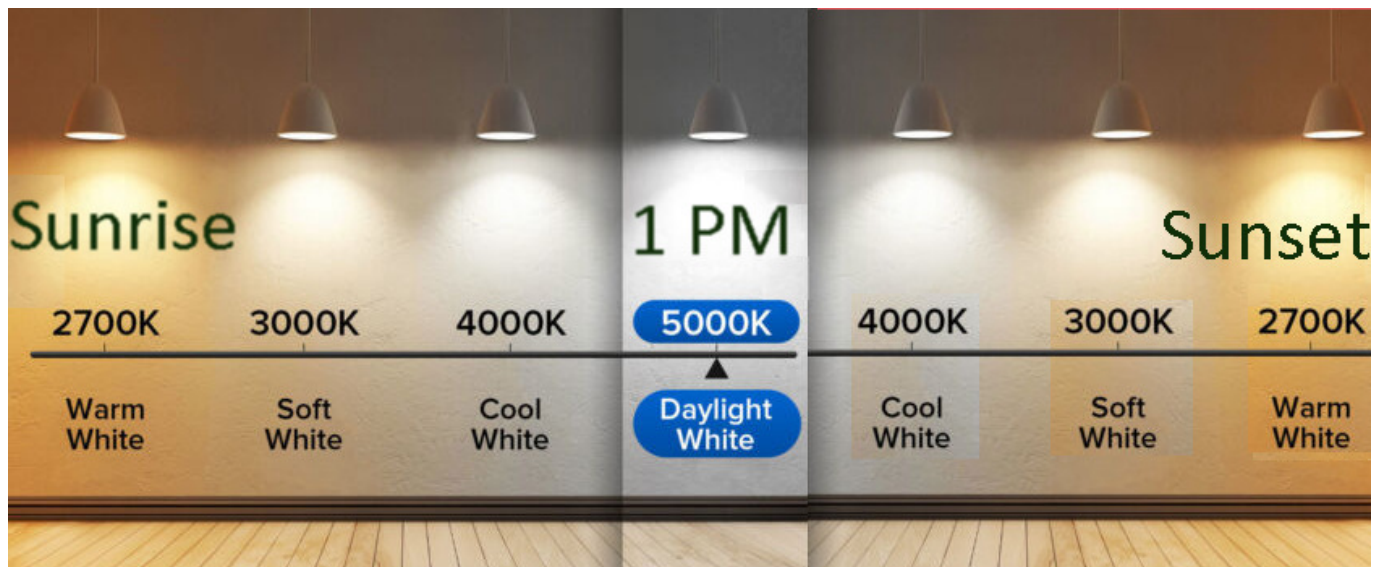

Size	Round 75mm hole diameter 90 mm mud ring diameter 62 m depth minus sheetrock	Square 93mm hole diameter 120 mm mud ring diameter 76 m depth minus sheetrock
CRI	90 or better	
Dimming	0 to 100%, flicker free, no artifacts	
Driver Type	Use 3 or 4 wire drivers	
Operating Wattage	6 Watts 9v @ 660 mA 9 watts 10v @ 880 mA	
Operating current	0 to 880 mA total of current in both channels, can mix for color control	
Lumens	620 @ 660 mA (6 watts) 930 @ 880 mA (9 watts)	
Beam Width	55 Deg	
Color Temperature	2700, 3000, 3500, 4000, 5000 Tunable 2700-5000	
Operating Voltage	7.5 to 10.0 volts	
Recommended wiring	Series, 4 or 5 fixtures in series sharing one driver	
Connectors	2x OJ-606 (M + F) not included Compatible with Ideal 30-082	
Constant Voltage	do not use Constant Voltage	
Operating Temperature	Ceiling mount, -20 to 50 Deg C non condensing	
IP Rating	IP65 Suitable for indirect water exposure

Optional Time of Day lighting rhythm

Any 660 to 1000 mA current source can be used. Up to 5 fixtures can be wired in series to share one driver. That driver can be located up to 70 ft from the LEDs – since constant current eliminates the concerns about voltage drop. Connecting both inputs in parallel will generate the color CCT marked #. .

360 mA operation

This 6 watt LED can be installed for 360 mA operation for use with 360 or 300 mA drivers. The total power is 6 watts at 3850 CCT with 330 mA or 9 watts with 500 mA. The voltage is 15-18v in this method.

Direct to Sheetrock – TL-60

Install the rough in ring using the side clamps – then mud in the ring.
The LED Engine slides up and in after painting is complete. We provide a plug to keep the interior clean.

Meet the DR2

The DR2 is the heart of the entire system. From the front it looks like a typical style wall switch with a slide dimmer. This is where the driver for the LEDs is located. The DR2 uses current control technology to provide perfect dimming to each of its corresponding LEDs. There are several different types of DR2 available, depending on application.
